Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: (1) 112, 2nd issue: claims 10 & 28 are hybrid claims; (2) 101 issue: rejected claims lack specific practical application and (3) 102(a) issue: proposed amended claim 1 is too broad. The "Classical School Style" technique still read on the claimed invention when several "coefficient multiplication operations" are zeros (the examiner gives an example: $a^2 - b^2 = (a-b)(a+b)$, substitute $a = 1$ & $b = x^5$, then the product polynomial equal $1 - x^{10}$. Therefore the total number of coefficient multiplication is ONE). Claim 35 is also too broad, the "Classical School Style" technique still read on the claimed invention. .
